## LANGUAGES

English – Professional working proficiency (B2)

German – Beginner

Russian – Native

## SKILLS

### EXPERIENCED

- HTML
- CSS
- JavaScript
- TypeScript
- Angular

### SKILLFUL

- SCSS, SASS
- RxJS
- NGXS

### BASIC KNOWLEDGE

- React
- Redux
- MobX
- Webpack

## PROFILE

I like to solve complex tasks, for example component for test cases search based on Jira Query Language.

I am interested in continuous self-development and professional growth. I follow industry trends by visiting meetups and conferences, listening to podcasts and reading articles on Medium. I prepared some talks by myself: about Vim usage, rendering pipeline. From time to time I write articles on medium.

I like to deeply understand things related to work, read documentation and specifications, love clean self-documented code.

## WORK EXPERIENCE

### SENIOR FRONT-END DEVELOPER @ DINS (RINGCENTRAL)

Oct 2019 – Present 1 yr. 8 mos.

I currently work on internal tool for rollouts and teams planning.

At this position I am in charge of:

- Applying new design to some pages of our application
- Doing code review of front-end requests
- Regularly participate in interviewing for our open front-end positions

**Supported configurations** for RC programs on project creation wizard (which steps to show, default states of input controls, filtering based on programs)

- Created a structural directive, which allows to conditionally hide and show ui elements based on user settings (for example table columns)
- During the first year I worked on an internal tool for QA (it allows to store test cases, requirements, execute test plan runs and create reports).

- I implemented Jira Query Language search with autocomplete for our project. It provides possibility to search for projects, test cases and to use other filters in single query string (for instance «Project = Web AND Satus NOT IN (Failed, Warning)»). After lexing/parsing this

- Jasmine
- Jest
- Node.js
- PHP
- MySQL
- MongoDB
- Docker
- Nginx
- Bash
- Linux (Ubuntu, Arch, Alpine)

#### HAD EXPERIENCE WITH

- Vue.js
- Cypress
- JSDoc
- Puppeteer

## HOBBIES

- Learning, Reading
- Electric Guitar
- Board Games

query is transpiled to backend request in JSON format. Now this component is shared across both projects in our department.

- I was in charge of migrating Angular application from old backend API to updated and rewritten new API
- Did a lot of refactoring of tree sidebar component which allows user to display test cases in different modes (tree, table, group) and is widely used across whole application. I also implemented displayment of statistics of test case execution for each node in this tree
- I initiated NGXS data mutations analysis and did future refactoring
- I introduced webhook for new merge requests notifications from GitLab (with Node.js and Express)
- Investigated and prepared rules and code style for writing application styles

#### FRONT-END DEVELOPER @ T-SYSTEMS

Dec 2018 – Oct 2019 11 mos

I took part in the development of «mShop», an SPA of Deutsche Telekom based on Angular, which helps their sellers in the offline stores to use special application instead of regular paper sheets and reference books.

Due to bad internet connection in shops where it is used and slow backend services this SPA is a fat-client with complex business logic on front-end.

At this position I was in charge of:

- Rewriting the **entire application styles to new adaptive design** with my colleague. We used modern technologies like flexbox and grids instead of old absolute positioned elements
- Organizing meetings regarding the progress of our work to german colleagues
- Implementing features on offer page, adding new summary presentation and appearance of customer's options

While implementing new functionality we did constant refactoring and bugfixing

#### JUNIOR FRONT-END DEVELOPER @ BANDITO

Nov 2016 – Sep 2017, 10 mos

At this design studio my main responsibility was development of landing pages and corporate sites.

I worked with HTML, CSS, SASS, Pure JavaScript and jQuery. Some projects were handed over after freelancers and required a lot of refinement and refactoring work.

Also I introduced git into developing process.

I had experience with installing web-sites on WordPress and supporting them.

Here are some examples of projects I took part in: [ADhoc](#), [Zverinus](#), [Bandito](#).

---

## PROJECTS

---

### NGX-DETACH-INVISIBLE

I developed a [directive for Angular](#) that detaches component from change detection if that component is not visible in view port.

This can be used as an optimization for components which have heavy calculations in templates which are not memoized or in projects which use default change detection strategy and do not want to use onPush for some reason on similar hard to render components.

Currently this project is more like a proof of concept and I plan to work on it more in future

---

## TEACHING EXPERIENCE

---

### TUTOR, EPIC SKILLS

May 2018 – Jun 2019, 1 yr 3 mos

I mentored students of this internet technologies school.

### TEACHER, ITMO UNIVERSITY, CHILDREN COMPUTER CLUB

Sep 2016 – Jun 2019, 3 yrs

Courses for children about web development basics.

I led the stream of web-development courses and was in charge of educational programs preparation.

I taught two courses: the basics of Frontend (Pure HTML, CSS, JavaScript, jQuery, Bootstrap) and the basics of Backend development (PHP, MySQL, Wordpress).

---

## COURSES

---

### FRONT-END SCHOOL #1, T-SYSTEMS

Okt 2018 1,5 mos

### NODE.JS SCHOOL, YANDEX.MONEY

Sep 2017 2 mos

---

## HIGHER EDUCATION

---

### ITMO UNIVERSITY

2017 – 2019

**Master**, Web Technologies, 4.87

My thesis was about reactive programming paradigms in the web and its implementations.

## ITMO UNIVERSITY

2013 – 2017

**Bachelor**, Computer graphics teaching, 4.73

My thesis was "Development of distant learning modules «CSS and JavaScript» for children computer education"

---

## **PUBLIC SPEAKING**

---

### **JIRA-LIKE SEARCH? EASY**

Public talk at DINS [Slides](#)

### **VIM: ВЫХОД ЕСТЬ, ПУТИ НАЗАД НЕТ**

(eng. Vim: there is exit but no way back)

PiterCSS meetup #31 [Slides](#)

### **ПРОЦЕСС ВИЗУАЛИЗАЦИИ. СТИЛИ И СПЕЦИФИКАЦИЯ. FLEXBOX & GRID. ПРЕПРОЦЕССОРЫ**

(eng. Rendering pipeline. Styles and specification. Flexbox & Grid. Preprocessors)

Front-end school #3, T-Systems [Slides](#)

### **GIT BASICS FOR QA ENGINEERS**
